# TALPHA EXYNET

## About Property

Talpa exynet merupakan environment Talpa Exynet Sensor Series dan Talpa Exynet Master yang menggunakan gelombang radio sebagai transmisi data sensor. Dengan teknologi ini memungkinkan pemantauan sensor secara online dan real-time ditempat yang tidak terjangkau sinyal baik WiFi maupun Selular.

## Fitur Unggulan

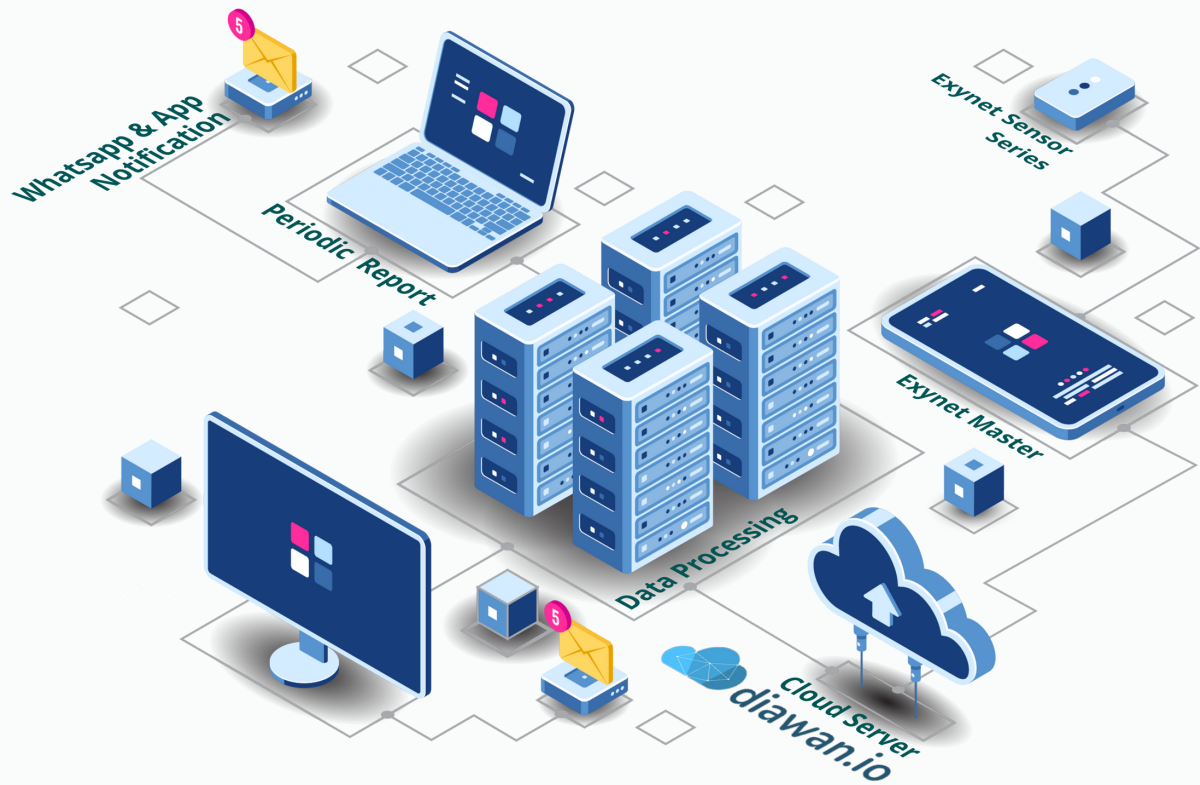

- Jangkauan luas up to 500m (clear air condition)
- Life Time baterai up to 2 th dalam sekali isi\*
- 1 master mampu terhubung dengan 10 node
- Realtime monitoring dan alarm
- Reporting mudah melalui paltform
- Garansi 2 th\*\*
- Controlling

### Aditonal equipment

- 1.exynet smart relay
- 2.exynet smart IR

\*Sensor suhu, suhu & kelembaban

\*\*1 tahun ganti sparepart, 1 tahun free service only

## Talpa Exynet Master

- Microprocessor** LX6 Dual-Core 32-bit
- Connectivity** 802.11 b/g/n Wi-Fi connectivity 150 Mbps  
443 Mhz Radio Frequency
- Range** Up to 500 m (with clear condition)
- Memory** SD Card Slot up to 32 GB
- Screen to body ratio** 1:7 (70%)
- Power** 5V/2A or using standard mobile power banks
- Interval reading update** 1 minute
- Interval sending update** 1-10 minute

## Talpa Exynet Sensor Series

- Microprocessor** 8 Bit AVR
- Connectivity** 443 Mhz Radio Frequency
- Range** Up to 500 m (with clear condition)
- Power** 3.7V Battery 3000mAh
- Interval reading update** 1 minute
- Interval sending update** 1 minute
- Splash proof** Yes
- Dust Proof** Yes
- Sensor** Temperature, Humidity, EC, PH, Gas Variants, Dust.  
Material Matter, Water Flow, Wind Speed, and etc.
